

Vevo PVCu Profile

Why it is the best on the market

Zero Air Leakage

Patented co-extruded bubble gaskets which out perform all others in permeability - achieving a zero air leakage result at independent tests at BSI.

Screw Retention

Hollow pockets allow for the insertion of UPVC screw retaining strips to achieve 'screw pull out forces' to rival 1.2mm steel.

Strength

The six chamber design achieves strength without the need for thermally inefficient steel inserts in both window sashes and window outer frames.

Energy Efficient

The uniquely designed six chamber energy plus system is so efficient it can achieve the energy ratings A+13 with a double glazed unit and A+23 with a triple glazed unit, which exceeds the new A++ standard.

Heat Conserving

A sign of how well insulated our Vevo windows are is that so little heat escapes, that it is not uncommon to see condensation on the OUTSIDE!

Lead Free

All Vevo Upvc products are completely lead free.

VevoChamfered

The chamfered option creates a symmetrical, contemporary, straight edged style.

Typically considered a more modern look.

VevoSculptured

The sculptured option gives a more curvaceous, traditional, decorative finish to your window.

A popular choice for period properties.

Colour Finish Options

Not just available in standard white, our windows can be personalised to suit the style of your home - as well as its colour scheme.

1. Stock Colours

The foiled colours are applied during the manufacturing process of the profile.

2. Special Colour Options

If the stock colours aren't quite what you want, special order colours are available.

The molecular cross bond process of Kolorbond means that the choice of colour for your windows is truly yours. Available in all standard RAL and BS colours. Colour can be applied to uPVC window frames, doors, conservatories and fascias. Guaranteed to adhere to the plastic and is extremely colour stable and resistant to UV. Vevo also offers a special order foiling option. Ask our sales team for details.

The colours shown in this brochure give an indication only. No guarantee can be given that they will exactly match the product

Handle Options

Your choice of handles complements your good taste in windows.

Our range of handles combines security, practicality and aesthetics for a long, trouble free service life - with colours and finishes to match or contrast with our uPVC products. Available in both straight and cranked styles.

Monkey Tail and Teardrop handles now available.

For the authentic look or ultra modern, we've got it covered.

Design Options

Windows

Trusting us to use Vevo products to transform your home and lifestyle brings exciting choices. Not least, the opportunity to choose from an almost limitless range of colours, profiles, textures and styles for the look you want.

Georgian Bar

At Vevo we manufacture our Georgian style double glazed sealed units with an internal bar to give the effect (at a distance) of separate sealed units.

This popular feature is always in demand as it combines stylish traditional looks, with an easy to clean, low maintenance finish.

Astragal Bar

Designed to replicate traditional timber windows, the Vevo Georgian astragal bar design goes one step further than our Georgian window.

As well as incorporating spacer bars between the glass, bars are also raised from the glass to give the window an authentic cottage style look, making the astragal bar extremely popular, particularly with owners of older-style properties.

Astragal bar is available in a range of colours. The standard size bar is 25mm and our new 50mm bar looks stunning when used as a false transom or a door mullion.

Leaded Glass

Traditional leaded windows are an important architectural feature of many houses and very much part of the English Heritage.

While a lead design serves no practical purpose today leaded windows can enhance a property of any age with character and charm. A wide choice of leaded window designs are available to closely match your existing windows. There are also two different colours of lead; silver and antique which provides a more aged look. Our leaded windows offer easier cleaning and maintenance as well as the enhanced insulating qualities of modern uPVC windows.

Decorative Glass

You don't have to lose the character of your property when you update your windows.

With a wide range of choice of decorative designs or even a bespoke design, your house will retain its character whilst gaining all the benefits of new windows.

Equal Sight Lines

A more traditional look is achieved by designing your windows with equal width frames ensuring a balanced and equal sight line across all glass units. This applies both horizontally and vertically.

Unequal Sight Lines

Having opening sashes in certain areas of the window creates an unequal glass sight line between the sash and the fixed light.

Windows

Not every PVCu window system is the same

Safe & Secure

Keep the intruders out!

When you're deciding which range of windows to choose for your home, there are a number of factors to consider:

- Will they look good?
- Will they be sympathetic to the overall building design?
- Will they exceed the most stringent energy efficiency targets and help minimise ongoing heating bills?
- Will they provide the highest levels of safety and security?
- Are they available in a wide range of styles and colour choices?
- Is there a range of matching doors, roofs and other products available?
- Will the products be guaranteed?

The Vevo range is different to other systems on the market – being designed from scratch to take advantage of the very latest developments in window engineering technology.

Combining high-tech design and engineering with the flexibility to create an individual appearance for every home, the Vevo system pushes the boundaries of possibility with a range that doesn't even need to look like PVCu. And with the patented double-action bubble gasket offering a continuous seal, even in the corners, draughty windows are a thing of the past.

Your home should be a safe haven – that's why all our windows are designed, tested and certified to meet the highest standards of security. We also cyclic test our moving parts to make sure they won't wear out, however much you use them.

Child restrictors can be fitted to almost any Vevo window to give you extra peace of mind that your little ones will be safe – please ask for more information.

Enhanced Security

High security shootbolts top and bottom.

The shootbolts are double the thickness than most on the market.

An end cam fitted close to the shootbolt adds extra security.

Metal keeps for maximum security.

The centre lock has robust opposing claws that firmly grip both ends of the keep to resist attack.

PAS24:2012

This accreditation is part of the British Standards system and shows that every component used to make the product has been subjected to a series of tests, demonstrating enhanced security performance for your peace of mind.

Secured by Design

A police-backed initiative, Secured by Design status is awarded to products designed with exceptional security features as their main priority. Products that hold this certification are tested to meet the requirements of the Association of Chief Police Officers'.

Better for the Environment

Energy ratings explained

One of the most effective ways you can save energy within your home is through installing energy efficient doors and windows.

Whether double or triple glazed, Vevo windows outperform most of the other leading windows in the UK – mainly due to our innovative PVCu multi-chambered profile design.

The BFR Energy Rating Scheme is the UK's national system for rating the energy efficiency of windows and is recognised within the Building Regulations as a method of showing compliance for your windows installation. The rating scale runs from A++ to E, and indicates how well a product will:

- Help you contain and conserve heat within your building in the winter
- Keep out the elements
- Resist condensation on the inside
- Contribute to improved sound insulation.

The Vevo windows that we install can achieve an 'A++' rating, better than most of our competitors, which means you'll be able to enjoy a warmer and quieter home as well as lower energy bills.

Lead-free

The Vevo windows we install are made from 100% lead-free PVCu – better for the environment and better for you and your family. You no longer have lead in your petrol or paint, so why choose to have windows containing lead?

EnergyPlus

Setting new standards

The Vevo EnergyPlus range offers even greater energy efficiency for your home.

The uniquely designed six chamber energy plus system is so efficient it can achieve the energy ratings A+13 with a double glazed unit and A+23 with a triple glazed unit, which exceeds the new A++ standard.

Why pay to heat your home, then lose up to 20% through your windows and doors?

Heat is being lost through inefficient windows and doors

Heat stays where it's meant to be – inside your home doors

Outside Inside

The cross section above shows how the multi-chambered profile prevents the transfer of heat from the inside to the outside.
